

Newline Interactive

Interactive Displays

Why Newline?

The most important aspect of any great product is how easy it is for anyone to use. Newline Interactive is dedicated to providing solutions for your customers that save them time and help them be more successful, by creating state-of-the-art products that are so simple to use that everyone can interact and enjoy the innovation behind them.

Newline Interactive Range

Newline displays are state-of-the-art interactive touchscreens designed to enhance collaboration, communication, and productivity in various settings such as classrooms, offices, and conference rooms. These large-format displays combine high-resolution visuals with responsive touch technology, allowing multiple users to interact simultaneously. They support a wide range of applications, from video conferencing to interactive lessons, making them a versatile solution for modern workspaces and educational environments.

Lyra Pro (TT-5523QA)

The most innovative education solution to date, Newline Lyra is more powerful, secure and future-proof than any previous solution. Extensive connectivity, amazing ease of use, and paper-like writing technology allow users to stay fully focused on teaching.

Elara Pro (TT-7523QCA+)

As the more powerful sister of Lyra, Elara really steals the show. This high-end interactive display carries every experience you could want in your workspace; faster, enhanced sound, a superior touch and writing experience.

Vega (TT-7522Z)

Vega, Newline's flagship model, is the high end solution for any boardroom offering an immersive AV experience. The sleek unique 3mm bezel combined with optically bonded PCAP offers a world class touch and writing experience.

Newline for Education

A teachers goal is to spark a passion for learning and engage their students in ways that expand their knowledge. Newline Interactive makes it easier for your customers to keep their students interested during class with tools designed for better collaboration and
